Title iO Announces New Vice President of Sales Sheila McGuire

SALT LAKE CITY (October 20, 2020) [Title iO Inc.](#), a provider of SaaS automation solutions to the escrow and title settlement industry today announced Sheila McGuire has joined its leadership team as its new Vice President of Sales. McGuire has extensive escrow, title and real estate technology experience, and a depth of key industry relationships. Formerly, she held a wide array of influential positions as corporate trainer, technical implementation director, and national sales manager with First American Financial Corp.

“We are extremely pleased and honored that Sheila has elected to join the Title iO leadership team,” said Ryan Whitlock, CEO at Title iO. “Her skillset, passion, and drive are a perfect match for our rapidly growing, innovative company. Sheila’s deep relationships and knowledge strategically complement our customer focused, growth-oriented vision.

“I am excited to be a member of the Title iO leadership team and further expand my capabilities given my extensive knowledge of the Real Estate Settlement (RES) industry,” echoed McGuire. “I am thrilled to be able to lead sales efforts that bring the industry’s most intuitive, holistic software solutions to the Real Estate Settlement marketplace”.

McGuire has consulted with hundreds of companies in the Settlement industry and will be tasked with accelerating their adoption of Title iO products and services, and growing the Title iO sales presence.

About Title iO™

Title iO is a Salt Lake City-based technology company that provides escrow and title settlement companies solutions to help with every step of the process. Title iO helps RES professionals integrate the products they already use, automate recurrent tasks, securely share sensitive documents, and create and assign to-do lists to ensure accuracy and organization throughout the escrow and title settlement process. Title iO connects GreenFolders and other leading title production systems to Cloud services and on-premise software applications.
