

RELEASE NOTES

Software Version 3.11.145

About this Document

GreenFolders Release Notes provide information on the latest version of the GreenFolders Office Management System.

Scope

This document discusses the system requirements, New Features, Improvements, and Bug Fixes included in the release.

Acronyms and Abbreviations

The following acronyms and abbreviations are used in this document:

GF	GreenFolders
OS	Operating System
SMTP	Simple Mail Transfer Protocol
SSL	Secure Sockets Layer
PS	PortalSync

GreenFolders System Requirements

This section discusses the system requirements for GreenFolders.

Workstation

- **Operating System:** Windows 10 Professional. 32-bit and 64-bit versions.
- **Framework:** Microsoft .NET 4.6.2
- **Processor:** Intel Pentium 4 @ 2.8 GHz, or greater
- **Hard Drive:** 200 MB Minimum; 1 GB Recommended
- **Memory:** 4 GB; 8 GB Recommended
- **Graphics:** 256 MB Minimum and DirectX v.9
- **Internet Connection:** An internet connection is required at each site for remote Help Desk support.

Server

- **Operating System:** Microsoft Windows Server 2012, 2016 or 2019 with current service packs. 64-bit version only.
- **Framework:** Microsoft .NET 4.6.2
- **Processor:** Core 2 Duo, Core 2 Quad or Xeon Class Processor
- **Database:** Microsoft SQL 2012, 2014, 2016, or 2019 Express or Standard. Recommendations based on user count; contact GreenFolders Sales or GreenFolders Support for details.
- **Memory:** 4 GB Minimum; 8 GB Recommended. Recommendations based on user count; contact GreenFolders Support for details.
- **Hard Drive:** Minimum 250 GB of available space dedicated for GreenFolders. Recommendations based on user count; contact GreenFolders Support for details.
- **Network Card:** Gigabit/100 MB network card. A static MAC address is required for virtual environments.

Backup Notice: When utilizing Microsoft SQL Express as your GreenFolders database engine, the data cannot be copied by regular system backups or automated backups and will require an additional specialized backup process. You are solely responsible for backing up GreenFolders data as it shall deem reasonably necessary to protect its images and information. GreenFolders strongly recommends that the specialized GreenFolders backup be done on a daily basis in addition to your regular system backups.

RELEASE NOTES

Software Version 3.11.145

Network Notice: GreenFolders is a client-server application for Windows designed to operate effectively in a variety of different network environments. If your organization has remote offices and/or your users connect remotely using Citrix, Terminal Server or some other remote application, please contact GreenFolders Technical Support to ensure desired functionality is achieved.

Improvements

The following improvements have been added:

- Added ability to create a trigger that executes selected actions when adding an attachment with a predefined name
- Add functionality to be able to Cancel a Task
- Created a new Action in Workflow Rules to cancel all open tasks in a folder
- Added notifications for Canceled tasks
- Added Combo Box Control Type Condition to Workflow Rules
- Updated Predefined Name Condition to new Workflow Rules Interface
- Enhanced notes to display more details in a list view
- Bi-Directional synchronization with notes between PortalSync and GreenFolders
- Added ability to resend/forward messages that have previously been sent using the copy function

Bug Fixes

The following bugs have been fixed:

- **Assignments**
 - Assign Folder Action does not retain settings for Assignee of "Me"
 - GreenFolders does not display any users or groups in the Assign To list
- **Tasks**
 - The task selection list scrolls vertically when attempting to select an item after scrolling past the first checkbox and when attempting to select an item with a long name
 - Task Assignee is not displayed correctly when modified by another user
- **Notes**
 - Notes Grid/columns resizable so the users can expand the note column and see the full content.
- **Attachments**
 - Documents printed from GreenFolders have degraded quality & PDF quality is diminished after burning an annotation
 - Attachment List scrolls unexpectedly when dragging an attachment to another position on the attachment list
 - Merging documents causes text to change in resulting PDF file
 - Fixed Attachments display at different zoom levels
 - Parties set for attachment notes are not saved
 - Fixed drag and drop email attachment support integration with Microsoft 365
 - Quick merge error was resolved
 - Sorting the attachments list does not keep the list sorted after leaving the folder
- **Permissions**
 -  Users were able to delete a folder when they do not have the delete privilege

- **Folders**
 - When creating a new FolderType a Task list can be set by the Create Task Action without user input
 - Clicking the image button in Streamline does not open GreenFolders
 - Opening a folder from the recent history throws an unexpected error
 - Opening an external folder with task throws "IsCancelled" exception
- **Home Data Grid**
 - Changing the Due time for a task on the Home Data Grid display as an hour later than what was selected
 - Adjust data grid to display Currency Control Type
 - Modified comments for existing Links are not displayed on the Links Data Grid
- **Messaging**
 - Emails with Brackets at the beginning of the subject line cause an error when added to a folder
 - Secure Sync - Messages added to GreenFolders with invalid email addresses prevent folders from saving
 - Send message by a workflow rule with an invalid email fails to send.
 - Commas for numbers or Currency do not display in Messages
- **Workflow**
 - Log Email Messages composed with External Mail Client in Folder History
 - Combo Box Control Type configuration - The Accepted Values and Rules Value Condition Drop down items are not synchronized immediately. You must click ok to save the values you've added and then go back into accepted values and update the rules.
 - If you try and delete a Priority with a workflow rule it does not warn you that a rule is associated it.
 - Clicking the X button does not trigger window for unsaved changes when closing the Workflow Rules windows
 - In Workflow Rules: Assign folder or task does not retain value
- **Saving**
 - Cannot save some file types using the "Save to Disk" option of Share - works with word, pdf, excel, and image.
 - Save button is enabled without making changes in Status, Priorities, Attachment Types and Task Templates
 - Conditions change order after saving, exiting, and relaunching the application when one of the conditions is disabled
- **General**
 - Fixed errors when logging in and printing
 - Dropbox does not move files to the inbox consistently
 - Saved password for 'Remember Me' does not work in load balanced environments
 - Optimized reading from audit log for folder opening timing issues
 - Upgraded GreenFolders and its dependencies to Microsoft .NET Framework 4.6.2
 - Fixed various crash issues
- **Search**
 - Improved search performance for folder-based searches
 - Fixed crash issue when grouping by nullable custom fields
